TYRE REPAIR

Package sizes	400ml
Description	Patching material for quick repair of tubeless tires.

TECHNICAL DATA

VOC content	Approx. 50 %
Shelf-life	10 years

FEATURES

- User-friendly
- Rubber-based
- Can be used without removing the tyre

USAGE

The aerosol should be at room temperature. The operating temperature should be +5°C ... +30°C. Shake before use. Determine the cause of the leak and remove it. Release the air completely from the tyre. Attach the adapter to the valve, hold the can upside down and push through the nozzle until the tyre is full. Drive about 10 km at a maximum of 50 km/h. Remove the propellant from the tyre and increase the pressure according to the car's instructions. It is recommended to replace the repaired tyre as soon as possible.
